The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-16 are rejected under 35 U.S.C. 102(b) as being anticipated by applicant's admitted prior art.

Applicant's admitted prior art (Figs. 1-6 and paragraphs 5-11 in the specification) discloses the claimed invention by forming an SPVG SONOS memory by providing a plurality of select gate structures 54 arranged in parallel, forming a plurality of sacrificial spacers 72, performing an implantation process to form doped region 76, removing the sacrificial spacers, forming an ONO composite dielectric layer 62 covering the select gate structures, and forming a plurality of word lines 80 perpendicular to the select gate structures on the composite dielectric layer.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ogura – US 6,248,633 and Ogura – US 6,759,290 describe memory devices and doped regions.
